

Trade School

A ministry to help train the unemployed of the Dominican Republic in the trades: carpentry, electrical, etc

With the automation of the rice planting and harvesting farming industry—100's of labourers are out of employment. Every Day Ministries has a solution! Trade School! The initial work has already begun with the completion of the school training building:

This is the street view of the new construction—complete with a teaching studio and a workshop. What is needed now is tools! Hand tools, tool pouches, tape-measures, carpenter

squares, power tools, table-saws, planers, chop saws—any tool item a tradesperson would use!

Two to three times a year Every Day Ministries Canada ships a container to the Dominican Republic. Beside Peaceful Streams is partnering with Every Day Ministries to get as many tools into these containers as possible.

Can you help? Do you have older—but good functioning tools you are no longer using? Can you watch for a sale and donate a hammer? A square? A tape measure?

Any tool item is greatly needed and appreciated.

Peter W Cusick is collecting these items and getting them ready to be shipped in the next container!

Contact Peter if you can help in any way
